

Composting and Mulching Equipment Manufacturers and Vendors: DON'T MISS THIS YEAR'S **EQUIPMENT SHOW AND DEMONSTRATIONS!**

- **Where: City of LA's Lopez Canyon Compost Facility**
- **When: Thursday, January 26th, 2017 from 8 am to 4 pm**
- **Why: We bring the buyers—you put on the show!**

For more than a decade, the USCC Conference has hosted the largest “live” equipment demonstrations for the composting and wood recycling industry in the U.S. Last year over 600 individuals saw dozens of grinders, screeners, turners, and other equipment in operation. There is NOTHING like this anywhere, and each year it just keeps growing. Don't be left out of this amazing annual opportunity!

In the DEMONSTRATION areas, each group of machines, grinders, windrow turners, screens, and application equipment, will have designated times to run with plenty of time for visiting with customers in between demos.

We also provide a DISPLAY-ONLY option. The display area is separate from the demonstration area and is strategically located to maximize your exposure. You can bring one piece or 10- -we have room!

Shuttle buses will run hourly during the morning from the Conference Hotel (Westin Bonaventure) in downtown LA to give everyone an opportunity to see your stuff. We will also be advertising this widely as a stand-alone event for the agricultural and wood processing communities.

Cost to participate depends of the equipment sales price and whether for display of demonstration, with discounts for USCC member companies. Check the registration form for details.

Equipment Show Schedule

7:00 AM	Load buses at Hotel
7:15 AM	First shuttle buses leave from Hotel, then leave at 8:15, 9:15 and 10:15
